551		Gilbraith (Henderson)	$ 940		90	90						

The Lower Freeport Coal in the Ramsaytown Field is completely exhausted. Former estimates credited this field with 500 acres of Lower Kittanning Coal underlying the properties of The Kersey Mining Company estimated at 4,000 tons per acre or 2,000,000 tons. An attempt was made to penetrate it with a slope and $56,000 was spent on the experiment. Extremely bad roof conditions were encountered and the project was abandoned in 1925. It is the opinion of this management that this field is not workable under present conditions and that it will be generations perhaps before it will have any economic value.

ASSESSED VALUE PER ACRE:

Fee	$47.35
Surface	20.38
Minerals	15.32
