

Data Plug-ins and Viewers for MrSID and JPEG2000 Imagery

Below is a list of several data plug-ins and viewers you can access that will help you display PAMAP imagery in MrSID and JPEG2000 formats in various GIS software.

LizardTech

Go to '<http://www.lizardtech.com/download>', and click on the 'Third Party Plug-ins and Updates'. Downloads available include:

- **GeoJP2™ ArcView Plugin** – for JPEG2000 use in Arcview 3.X
- **MrSID AVMrSID.dll** – for MrSID use in Arcview 3.X
- **GeoJP2™ Viewer** – A small standalone viewer application useful for quick display of JPEG2000 tiles. The Viewer opens one image at a time, allows for zoom and pan, and displays the cursor's x,y pixel coordinates from the georeferenced image. It also allows you to read the image properties and GeoJP2 metadata.

ER Mapper

Go to '<http://www.ermapper.com>'. Go to 'products & downloads', and then click on 'Download Plugins'. Downloads include:

- **ArcGIS® 8.x and 9.x ECW JPEG 2000 plugin 3.01**
- **ArcGIS® 8.x and 9.x ECW JPEG 2000 plugin 4.0 Beta**
