

X-section through 190 slope  
 Lackawanna Mine Tour  
 (Looking SW)

Prior to reconstruction slope was  
 caved about 300 feet down from  
 surface (inclined measurement) and @  
 bend into gangway about 700 ft  
 down along slope. Gangway also  
 caved just beyond bend.

Tunnel is No. 191 Tunnel  
 (Clarke to Dunmore veins)

No. 1 Dunmore apparently splits  
 to NW, where Top No. 1 Dunmore  
 comes in.
