AMERICAN GEOLOGICAL SURVEY
GENERAL INVESTIGATION MAP 1000
GEOLOGIC AGE OF COALS OF THE UNITED STATES

COAL PRODUCTION BY STATE: 1995
From the Department of Energy, Office of Energy Information

US COAL PRODUCTION BY YEAR
1990-1995

Mean Total Sulfur and Caloric Values of Raw Coal Samples by Major Coal Regions in the U.S.
Shown in Relation to Environmental Protection Agency Compliance

EXPLANATION

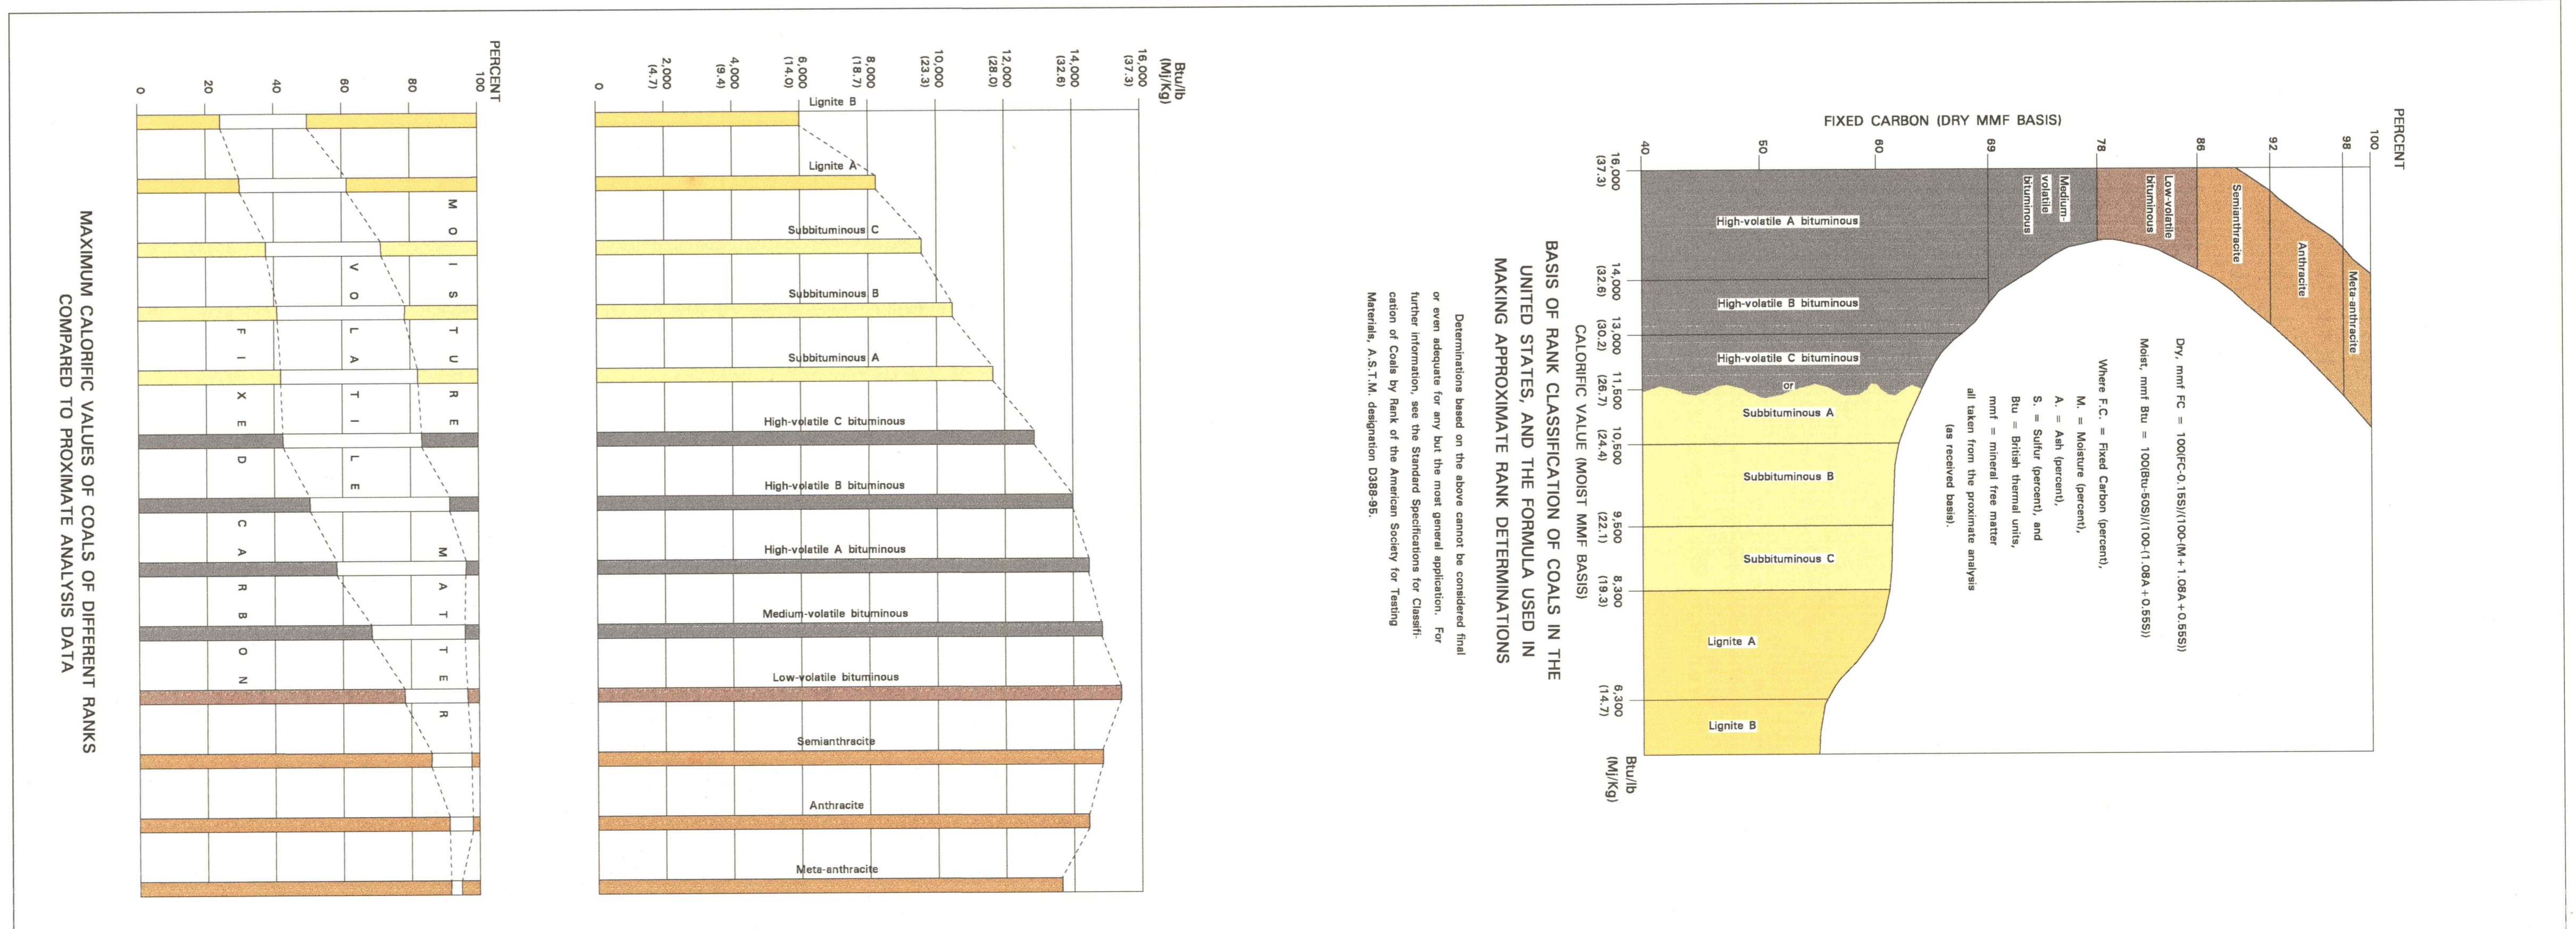

- Appalachian, Appalachian and West Virginia
- Low-volatile bituminous
- Subbituminous
- Light
- Light A
- Subbituminous C
- Subbituminous B
- Subbituminous A
- High-volatile C bituminous
- High-volatile B bituminous
- High-volatile A bituminous
- Medium-volatile bituminous
- Low-volatile bituminous
- Semianthracite
- Anthracite
- Met-anthracite

Major coal fields shown in yellow. Major coal provinces shown in orange.

Other symbols: State boundaries, Major cities, Major rivers, Major highways, Coalfield power plants, etc.

Coalfield names shown in yellow. Coalfield names shown in orange.

Coalfield names shown in yellow. Coalfield names shown in orange.

Coal Fields of the Conterminous United States

Geology and Compilation by James Trumbull
Digital Representation by National Coal Resource Data System Staff
1996

DRAFT COPY

DISCUSSION

This map is a compilation of coal fields in the conterminous United States. It is based on the work of many geologists and geographers who have studied the geology of the United States. The map shows the distribution of coal fields and the geologic age of the coals. The map is a compilation of coal fields in the conterminous United States. It is based on the work of many geologists and geographers who have studied the geology of the United States. The map shows the distribution of coal fields and the geologic age of the coals.
