

EXPLANATION

J. PAUL

Warranty tract
Boundaries indicated for general orientation and identification, but not authenticated for legal purposes.

Boundary of mine

Area reserved for barrier pillars in Buck Mountain coal bed

Outcrop of the Buck Mountain coal bed

Contours on the bottom of the Buck Mountain coal bed
Solid in mined areas; long dashes in unmined areas; in those places where a part of the bed lies beneath another part of the same bed, short dashes are used in mined areas and very short dashes in unmined areas.

Fault cutting the Buck Mountain coal bed showing slip and relative position of faulted segments.
Long dashes where approximately located; short dashes indicate approximate location of fault trace on underlying bed where beds are duplicated by faulting. U, upstream side; D, downstream side; + is on upper segment.

Shear zone

Anticline
Showing position of crest, dashed where approximately located.

Syncline
Showing position of trough, dashed where approximately located.

Drainage channel

STRUCTURE MAP OF THE BUCK MOUNTAIN COAL BED

SCALE 1:6,000

Contour interval is 100 feet
Datum is mean sea level

Prepared in 1948 from data supplied by the Natalie Coal Corporation, Lehigh Valley Coal Company, and Susquehanna Collieries Company with modifications by the Geological Survey, United States Department of the Interior.

APPROXIMATE MEAN DECLINATION, 1944

Location of a topographic quadrangle is shown in this map
