HRACTE

This image shows a heavily damaged, yellowed page from an old document. The paper is stained with numerous brown spots and streaks, suggesting water damage or mold. Faint, illegible markings are visible, particularly a series of parallel lines forming a grid pattern in the lower-left quadrant. A prominent vertical line runs down the right side of the page. In the top left corner, there is a small, partially obscured red stamp or mark.

This image shows a page from a medieval astronomical manuscript. The page features a large, faint grid system overlaid on a background of numerous small, dark spots representing stars. A prominent feature is a series of concentric, curved lines that form a complex pattern, likely representing a specific astronomical model or projection. In the lower center, there is a small, distinct circle with a dot inside it, which may represent a specific star or a point of interest. The entire diagram is set against a light beige or cream-colored background.

This image shows a severely damaged page from an old document. The paper is a light cream or yellowish color, showing significant signs of age and deterioration. A large, jagged tear runs diagonally from the top left towards the bottom right. Numerous small, dark brown spots, characteristic of foxing or water damage, are scattered across the surface. In the bottom left corner, there is a small, rectangular piece of paper with printed text. The visible portion of the text includes the numbers '168' and '1866', likely indicating a page number and a specific date. The overall appearance is one of great age and physical abuse.
