

**DRAFT**

This is a detailed topographic map of a region in Washington, likely from a historical or specialized survey. The map features contour lines indicating elevation, with major peaks reaching over 1300 feet. Key geographical features include Keystone Lake, Plum Creek, and several smaller water bodies and creeks. The map is heavily annotated with red lines and numbers, suggesting a specific geological or surveying project. A legend is visible in the top left corner, and the word "WASHINGTON" is printed across the right side of the map. The map also shows various landmarks, including churches, schools, and bridges, as well as numerous gas wells and mines. The overall appearance is that of a technical drawing or a specialized map used for land management or resource extraction.
