

THE DECLINATION OF THE COMPASS NEEDLE, 1952

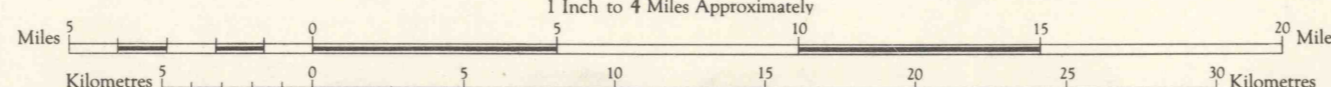

The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is between those given on the nearest red lines. The declination at the place marked A is the declination between N. 11° 30' E. and N. 11° 30' E. The declination of the compass needle is decreasing 5 minutes annually.

Based on sectional maps of the Survey and Mapping Branch, Dept. of Mines and Technical Surveys  
Aerial photography by the R.C.A.F. 1947.  
Recompiled, drawn and reproduced by the Army Survey Establishment R.C.E.  
Department of National Defence, 1951-53.
