

SECTION A-A
SCALE: 1"=20'

PERIMETER DIVERSION DITCH DETAIL
N.T.S.

- Notes:
- Existing emergency spillway crest elevation is 1568 and is not shown for clarity.
 - In order to establish the revised maximum normal pool at elevation 1560 the top of the highest decant riser should be cut-off to elevation 1560. After cutting the riser pipe off at elevation 1560, the cap plate shall be reinstalled atop the riser pipe in accordance with the details shown on GAI Drawing 82-312-E12, Revision 2 (the original design).
 - Existing embankment configuration provided by BethEnergy on December 12, 1989.
