

GENERAL NOTES

Contour Interval - Contours shown on Overall Permit Map are USGS 20' Contour Intervals.

Property Lines & Ownership - Obtained from Luzerne County Tax Assessment Records. See Module 5 for ownership listings.

Underground Mine Workings - The entire permit area is underlain by abandoned mine workings in multiple veins. These workings are as shown on the Overall Sections. The veins were mined in the area by the Glen Lyon Colliery. Since the mining extends throughout the permit area, the limits are not shown on the Plan.

Mine Pool - The Glen Lyon mine workings are water filled below the overflow elevation at the Glen Lyon Pump. The mine pool elevation varies, but does not exceed the overflow elevation at 663.7.

Bonding Increment No. 1 - See Drawing 8936-2 for Operations Plan.

- LEGEND**
- S.M.P. LIMIT
 - BONDED AREA - STRIPPING 85' DEPTH
 - BONDED AREA - ASH DISPOSAL/SUPPORT
 - WATER MONITORING POINT
